PLAN 1: FULL Plug & Play Smart Box with Tablet

Deliver a complete all-in-one system: Raspberry Pi + Tablet pre-installed and configured. The co-working space only plugs it in.

INCLUDED HARDWARE

- Raspberry Pi 4/5 (4GB): Mini server running the entire platform
- 32GB+ microSD Card: Preloaded with OS, web server & your app
- Power Supply (5V 3A): Stable power for 24/7 usage
- Ethernet Cable: Connect to router for reliable LAN
- Raspberry Pi Case: Cooling and protection
- Android Tablet (10"): Used by users to sign in, view map & check in

INSTALLATION & SETUP STEPS

OPTION 1: With Firewall (Full Security & Internet Access Control)

- 1. Flash Raspberry Pi OS & Setup Server:
 - Install LAMP stack (Apache, PHP, MySQL)
 - Add Python 3 + your scripts:
 - Generate internet coupons from IPFire
 - Extract MAC addresses and link to users via coupons
 - Send email notifications on subscription/session start

2. Deploy Your Web App:

- User UI (welcome, signup, space map, coupon access)
- Admin Panel with all management sections
- IPFire integration for full internet access control
- 3. Configure Local Access:
 - Assign static IP (e.g. 192.168.1.150)
 - Setup local hostname (e.g. cowork.local)
- 4. Tablet Configuration:
 - Load user UI in browser (e.g. http://cowork.local)
 - Add shortcut to home screen
 - Lock in kiosk mode (one app only)
- 5. Final Branding & Testing:
 - Customize with client logo, name, prices
 - Test user journey: Sign-in Select seat Start session Receive coupons
 - Test all admin features

OPTION 2: Without Firewall (Simplified Version)

- Skip IPFire installation
- No coupons or MAC address tracking
- No Python scripts for coupon generation or MAC mapping
- User UI: Sign-in Select seat Start session
- Admin Panel still includes: user management, seat control, session tracking, pricing, service requests, messaging, statistics

- Suitable for spaces not requiring internet restriction or deep monitoring

WHAT YOU DELIVER TO CLIENT

- Raspberry Pi Unit: Pre-installed server with selected option
- Tablet: Fully configured for check-in and user access
- LAN-Ready Setup: Static IP and local hostname assigned
- Full Admin System: Admin tools for full space control
- User Guide + Staff Training: Simple instruction manual & on-site guidance

SECURITY & MAINTENANCE

- Admin panel protected by login
- Python scripts obfuscated or encrypted (if installed)
- SSH locked with strong password
- Optional IP-restricted admin access

PRICING STRUCTURE (TND)

- Raspberry Pi Unit: 400

- Android Tablet: 600

- Full Setup & Installation: 250

- Subscription (3 months): 600

- Subscription (6 months): 1,000

- Subscription (12 months): 1,600

First-Time Package Total (tablet + setup + 3-month license): ~1,850 2,100 TND

OPTIONAL ADD-ONS

- Custom branding (logo/UI): 200

- Extra tablet or screen setup: 500700

- Emergency on-site support: 150

- Cloud dashboard integration: Ask for quote

This plan is ideal for co-working spaces that want a locally managed access system with or without firewall-level internet control, tailored to their infrastructure and operational style.
